The following is a quotation of the appropriate paragraphs of 35
 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 3, 5-12, 14-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Sunano-US 2001/0038941. (Sunano)

Reference is made to Figure 3 of Sunano along with paragraphs 31-35 where a battery is taught that includes a casing having a metal layer 11 located outside of a resin layer 13 relative to a battery element and further including an adhesive between the two layers. It is noted that the adhesive is a modified polyolefin-a denatured polypropylene. The thickness of the adhesive is 5 microns-see paragraph 34. In view of the adhesive in Sunano being the same thickness and formed of the same material claimed by applicant, it is inherent that the adhesive would possess the claimed water vapor transmission rate. Paragraphs 32 and 33 in Sunano set forth the claimed anode, cathode and electrolyte materials.

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the

Art Unit: 1745

subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 2, 4 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sunano in view of Yamashita et al.-US 7,041,380. (Yamashita)

The only claimed elements not taught by Sunano are the acrylic adhesive and for the polypropylene including a carbonyl. Yamashita discloses an adhesive resin layer in a battery in column 26, lines 3-10 including an acrylic resin and an acid-modified polypropylene (which would include a carbonyl group). It would have been obvious to one of ordinary skill in this art at the time the invention was made to have included the acrylic adhesive or the acid-modified polypropylene of Yamashita in the battery case of Sunano because of the known high bonding strength of these materials.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 571-272-1287. The examiner can normally be reached on Monday-Thursday, 6:15-3:45, and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/796,240

Art Unit: 1745

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
